Sir,

I am the personal physician for Mrs Radha Burnier, who has authorized me to furnish you with a medical certificate.

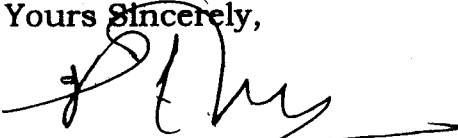

As a senior physician, I have been looking after Mrs Burnier for more than ten years.

Mrs Radha Burnier had a "TRANSIENT ISCHEMIC ATTACK" (TIA) on 11 Novewmber 2006. She recovered quickly and completely after taking a period of rest, and also prescribed medication. She is now doing extremely well, and has no health problems. Both her physical activity and mental alertness are excellent, and I have permitted her to drive her car, and she is driving regularly.

In my opinion she is fit to undertake any responsibility involving strenuous physical and mental activity, and undertake travel both within India and overseas.

I am sure this will clarify the doubts of some members of the Theosophical Society about her current state of health, and this can be communicated to them.

Yours Sincerely,

(Dr. P Thirumalai)

This is to testify that I have examined Dr (Mrs).Radha Burnier on 11th and 12th of April 2008 in Adyar. I had reviewed her medical problems and found that she has recovered from a mild stroke and that there is no need for any undue concern regarding her health. At present she is having no motor weakness; her speech and higher functions are normal; She has no problems related to attention or decision making in goal-oriented problems. She is attending her office and is able to exercise her work as the president of Theosophical society. Considering her age and after the present medical evaluation I can very confidently assure that there is absolutely no need to worry about her health. It is very sad to hear rumors regarding her health, which does not pertain to facts.

I hereby testify that Dr.(Mrs).Radha Burnier enjoys good health and any scandals contrary to the same is not in accordance with facts.
