

A SHORT BIOGRAPHY OF ITC

From *ITC Magazine*, October 2011, pp. 5-8
Republished by *Theosophy in Slovenia*, October 2013

International Theosophy Conferences, Inc. now has a global membership representing many Theosophical traditions. It is the only theosophical effort which has been and is devoted to unity and inter-communication among all students of Theosophy. As it is not associated with any theosophical organization it can draw from all theosophical organizations and traditions. It draws as well from those who may be considered outside of traditional theosophy including science, Buddhism, and literature.

Major Steps:

- Grown from an informal to formal status as a non-profit corporation.
- Has reached out internationally.
- Expansion of Committees which can interlink among Theosophical traditions.
- Launched International Theosophy Magazine.
- Made unity and intercommunication of Theosophical traditions a primary focus.

The subject of topics presented at conferences over the years show the scope and breadth of what has been offered. Some of this is shown below to highlight directions.

2002 – Long Beach, California

Culture of Concentration; Plotinus, Abraham Maslow and the Theosophical Path

INTRODUCTORY NOTE TO: %EMANATION AND FOHAT AS THE BASIS FOR THE ELECTRIC UNIVERSE+And %COHERENCE: BRIDGING PERSONAL, SOCIAL, and GLOBAL HEALTH+

We feel these two articles represent science and theosophy starting from two different poles. The first article starts with universals and steps down magnetic fields to our present world. The second article builds from scientific evidence and builds to extraordinary implications of the nature of who we are. Many would agree the science is solid. Many would also agree that theosophical ideas dovetail very clearly with the science.

Joop Smits, a world class Engineer from the Netherlands and a member of the Theosophical Society . Point Loma, is the Committee chairman for International Theosophy Conferences, Inc. Science Committee.

Rollin McCraty, Ph.D. is Director of Research for HeartMath . an organization devoted to the concept of coherence as it applies to all levels of our being . including the earth. He is not a Theosophist. The conference did extend an invitation to him to present as

the HeartMath research and programs have many parallels to Theosophy. Dr. McCraty kindly made this published paper available to us for this magazine. We are also grateful to their staff for helping with the reproduction of the graphics. We invite all who have an opportunity to review these articles to send us your comments so they can be published in a later edition.
